

Full STEAM Ahead-MY WHY

Dennis Douglass Jan 14, 13:53

My experience while here at Suncoast STEAM Academy I must say has been beneficial towards the development of communication skills in the classroom. With the recent implementation of Social Emotional Learning, I have been granted the opportunity to actually hear what the students have to say about a variety of topics and the emotions that accompany those words. Knowing there are others in the room that support you emotionally and socially allows for the learning environment to be safe, productive, and trusting.

I like attending the school because of the teachers and the skills that come with the online course. The teachers welcomed me in for my first year attending. They make every zoom fun and keep my peers and I engaged. Having the online course helps me be a better student. It teaches me time management, independence, and study skills. I have to take time out of my day for each class, creating my own daily schedule. It forces me to be on top of my work 24/7. I must watch the lectures and create my own notes. All the skills can be applied in my life later on, and because of Suncoast, they are now stronger. I wanted to attend a school that focused on STEAM because the program is very beneficial. STEAM teaches students many life skills. Including teamwork, empathy, responsibility, and many more. On top of that, robotics is very fun and as a girl, I want to inspire others to try engineering as well! --Ava, 8th Grade

Hi, I am Leonidas [redacted] i am in the 6th grade. I like this school because edgenuity is fast and it teaches me good i like the school because Mr.Garry is a really good teacher and he is funny.

Anonymous Jan 14, 12:36

My name is Sardar and I'm in the 9th grade. I joined the basketball and soccer team for all of my middle school years and robotics for some of them. I think I have grown more mature emotionally since I was in middle school, I used to disturb the class and run around but now I feel like I have more self-control. I like how the school has online capabilities, but also liked it when it was face to face classes. The teachers there help you understand what you're reading or doing and if you make a mistake they make sure you grow from that mistake. They can help after class too, like when you get stuck on something or you don't get it, they will try to help you learn it no matter how long it takes. The teachers always care about you and always try their best to make sure you graduate from college. they try their best to make the classroom a positive learning environment and treat you with the utmost respect. the school will make sure that everyone is treated equally no matter what you look like or where you are from, you will be treated with the same respect as everyone else

Fazal Bahramzi Jan 19, 11:31

My name is Fazal and I have started my work as a teacher assistance with the NUA 1001 STEAM in 2014. I enjoying working with the school because of its diverse rich cultural and social environment. I have maintained a balanced relationship between the school's staff members and the students' parents. Both, the community members and school have good relation and share their views, feedback, supports and other related issues toward achieving the goals. The students and their parents are very respectful and open to discuss their children progress, achievement, problems and the help they need to improve their progress. I hope for the betterment of the students future under the current leadership of the Suncoast STEAM Academy.

COVID-19 has kept us in our homes since March of 2020. Many schools including ours were forced to go online only and work from home. Many schools have been struggling since the start of the pandemic however Suncoast is one of the few schools in San Diego that have had experience with working online even years prior to the pandemic. This means that the school has an advantage over others thus making the learning experience much easier and more helpful. Teachers are also very helpful and will give you the resources you need if you are having trouble on pretty much anything related to your school work. - Hassan, 11th Grade

The enormous opportunities Suncoast STEAM Academy offers enabled me to fully grow as a person. Suncoast builds on my future by giving me the flexibility of taking college courses while being in high school. This gives me first-hand experience of what college is really like. Additionally, Suncoast offers a wide range of activities that builds an aptitude for learning and increases your intellectual vitality. You can showcase your potential by participating in varsity sports, be an innovator through robotics, enrich your creative thinking skills by joining yearbook, or exercise your writing skills through newsletter. Suncoast's supportive community is especially remarkable; everyone is always there, ready to help you. I definitely recommend Suncoast STEAM Academy. (Sharfa, 12th grade)

I like attending Suncoast because the teacher always cares about the student personal life and because I want to enhance my vision of my self and my future. --Hayaat, 8th Grade

Anonymous Jan 25, 13:25

Hi,I am Malia [redacted] Im in 6th grade.I like School because edgenuity is a easy way to learn without using a text book ,its also easy because you just press submit and your teacher can grade.I also like my teacher he is really funny but also teaches us while making class fun but at the same making class educational
